CODE U312
UNIQUE TILTING & SWIVELLING VISE

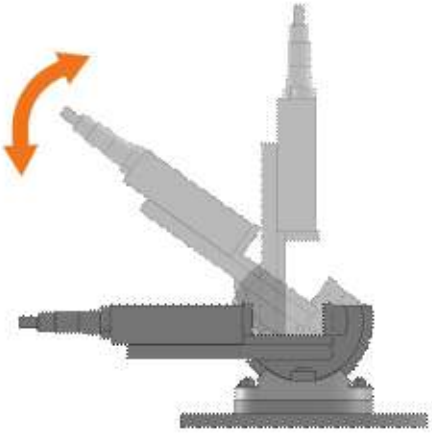

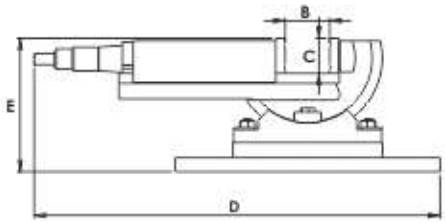

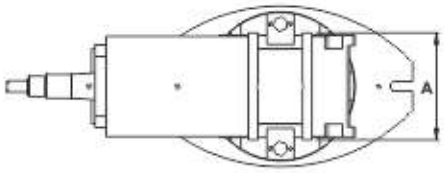

FEATURES

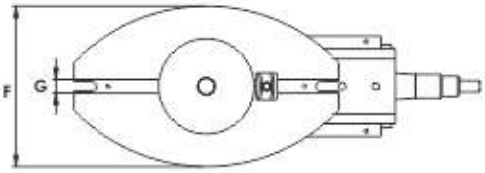

- Horizontal swivel movement 360 degree.
- Vertical swivel movement of 90° in the A rotational axis.
- Positive locking to withstand heavy loads.
- Fitted with thrust bearing for smooth movement and less fatigue.
- High Quality ACME Steel screw.
- Vise body is made from high strength graded cast iron for toughness and rigidity.
- Jaws are made of special steel, which are hardened and precision ground.
- Jaws are provided with one vertical and two horizontal 'V' grooves to hold round jobs rigidly.
- Quick alignment to machine table through longitudinal slot provided in the swivel base.
- Crank handle is made of unbreakable steel and consists of a spring loaded ball mechanism to provide a positive grip during operations.

Also available in High quality FCD 60 vise body
